SynChallenge Improvements
Bronte Wen

- Grey-level co-occurrence matrix features:
  - Homogeneity (original)
  - Contrast
  - Energy
  - Correlation
- Counted number of blobs using the Difference of Gaussian (DOG) method
- Counted number of locally maximum peaks
- Increased *n_estimators* to 300, *min_samples_split* to 10, *min_samples_leaf* to 5, set *max_features* to 'None'

- f1 score increased from 0.77 to default of 0.82 and a best of 0.83 with 0.45 threshold
